

Technical Data Sheet

February 2023

Porous Surface Primer

DESCRIPTION

Porous Surface Primer is a multipurpose rubber polymer primer and adhesion promoter formulated for use prior to the application of PLUS BASE.

Porous Surface Primer is suitable for use on concrete and cementitious substrates to consolidate the surface and provide an excellent surface for overcoating.

ADVANTAGES

- Improves PLUS BASE adhesion.
- Consolidates dusty and powdery surfaces.
- One coat application.
- Non-toxic – low VOC.

SUBSTRATES

- Concrete
- Fibre cement sheeting
- Masonry
- Screeds
- Render
- Most common cementitious materials

TECHNICAL DATA (@ 25°C)

Number of Coats:	1
Coverage: (per coat)	7-10m ² /L
Full Cure:	7 Days
Shelf Life:	12 Months
Clean Up:	Water

SUBSTRATE PREPARATION

- Surfaces must be clean and free from all contaminants.
- Concrete must be allowed to cure for 28 days, screeds and render for 7 days.
- Porous Surface Primer is ready to use, simply stir well before application.

APPLICATION CONDITIONS

- Temperature between 10°C-35°C.
- Do not apply if relative humidity is above 85% during initial cure phases, or if rain is expected before cure.

Note: When applying internally or in humid conditions, air flow should be maximised with the use of fans to assist cure.

APPLICATION

- Apply Porous Surface Primer with a good quality brush or roller.
- Due to the wide variety of substrates, a porosity and adhesion test is recommended prior to full application.
- Apply 1 coat evenly as per recommended coverage rates and allow to dry before overcoating.
- Ensure good air flow to assist with drying.

SAFETY AND FIRST AID

Porous Surface Primer Safety Data Sheet is available upon request.

Safety

- Ensure good ventilation and avoid breathing vapours.
- Avoid skin and eye contact. Wear gloves and eye protection. Remove splashes on skin immediately and remove contaminated clothing.
- Keep out of reach of children.
- Keep container sealed when not in use.
- Do not swallow.

First Aid

- If poisoning occurs, contact a doctor or poisons information centre: Ph. 13 11 26.
- If swallowed, do not induce vomiting. Give a glass of water to drink.
- If in eyes, hold eyes open and flood with water for at least 15 minutes.
- If not breathing, apply artificial respiration.
